

Is Your Parking System PCI Compliant?

Professional Parking Solutions

ZEAG and PCI Compliance

ZEAG is a world-leading specialist in parking solutions and services for revenue collection, management and control systems. Our highly modular parking and revenue control system, *Orion^{XR}*, consists of four major components: entry, exit, payment and the management system. We provide a reliable, user-friendly solution for any size off-street parking facility.

PCI Compliance is required in the United States and is critical for any company that stores, processes or transmits cardholder information.

It applies to all organizations or merchants, regardless of size or number of transactions. **ZEAG** prides itself in being listed on the certified PCI Security Standards website.

ZEAG achieves continued re-certification to ensure that ZMS software meets all PCI/DSS requirements.

Rest assured, with **ZEAG** lane equipment hardware & ZMS software, we outline a program to help our clients maintain ongoing PCI Compliance with efficient and secure products.

Please contact **ZEAG America** for further details.
